

AI Workflow Intake Worksheet v1

Use this optional worksheet to name the messy workflow, list current tools, and clarify where custom software or AI assistance may help.

1. Business snapshot

Company or organization

Your role

What does the business or team do?

Main customer, stakeholder, or internal user

2. Tools and AI reality

Which stage is closest?

Not using AI yet

Experimenting

Regular use

Blocked by risk

Hard to manage

Tools already used

Where is AI creating questions, delay, rework, or risk?

3. Workflow opportunity

One recurring workflow worth improving first

Where does it waste time, create errors, slow sales, weaken reporting, or increase risk?

What would better look like in business terms?

4. System design signals

Check the areas where the team needs clarity before building or adding AI assistance.

Workflow: trigger, owner, output, review point

Tools: current apps, spreadsheets, inboxes, docs

Handoffs: who receives what and when

Data: approved inputs, sensitive data, access

AI fit: drafting, summaries, checks, extraction

Support: training, docs, stop rules, changes

5. Next step fit

Desired result

Save time

Improve quality

Support revenue

Reduce risk

Speed reporting

Clarify fit

Timeline

Now

30 days

90 days

Later

Budget readiness

Fit-call value

Ready for a \$5k+ build

Need a smaller blueprint first

Exploring fit

Worksheet for call prep only. The web form is the submitted intake record.
