

AI Workflow Fit Worksheet v1

Use this optional worksheet to prepare for a fit conversation, share notes internally, or clarify the workflow before a pilot decision.

1. Business snapshot

Company or organization

Your role

What does the business or team do?

Main customer, stakeholder, or internal user

2. Current AI reality

Which stage is closest?

Not using AI yet

Experimenting

Regular use

Blocked by risk

Hard to manage

Where is AI creating questions, delay, rework, or risk?

3. Workflow opportunity

One recurring workflow worth improving first

Where does it waste time, create errors, slow sales, weaken reporting, or increase risk?

What would better look like in business terms?

4. Need and risk signals

Check the areas where the team needs clarity before trusting AI in the workflow.

Scope: workflow, output, owner, review point

Data: approved inputs, sensitive data, retention

Tools: allowed tools, access limits, blocked actions

Evidence: sources, assumptions, exceptions

Approval: human review before business action

Recovery: stop conditions, incidents, rollback

5. Next step fit

Desired result

Save time

Improve quality

Support revenue

Reduce risk

Speed reporting

Clarify fit

Timeline
